

The screenshot shows the Power BI Desktop application window. At the top, the title bar reads 'Design a Report in Power BI Desktop' and '31 Minutes Remaining'. The ribbon is set to 'Instructions', with 'Resources' and 'Help' also visible. The 'Pages' pane on the left shows 'Overview', 'Profit', and 'My Performance' (which is highlighted with a red box). The main report area displays a bar chart titled 'Profit by Country' with data for Canada, France, Germany, and the United States. Below the chart, a navigation bar contains icons for 'Reset to default', 'Bookmarks', 'View', and a search icon. The 'View' icon is highlighted with a red box. A context menu is open over the 'View' icon, showing options: 'Full screen' (highlighted with a red box), 'Fit to page', 'Fit to width', 'Actual size', and 'High-contrast colors'. Below the chart, a filter bar shows 'My Performance' and navigation arrows. The 'Full Screen' button is highlighted with a red box.

27. At the top-right on the menu bar, select **View**, and then select **Full Screen**.

28. Interact with the page by modifying the slicer, and cross filtering the page.

29. At the bottom of the window, notice the commands to change page, navigate backwards or forwards between pages, or to exit full screen mode.

30. Select the right icon to exit full screen mode.
